DAY 2: Friday January 26, 2018

Chairman: Sebastien Charosky

Plenary Session

08:30 Introduction of Day 2

08:35 Enhanced recovery after surgery protocols, is it time to change practice?

08:50 How poor planning leads to unforeseen complications?

09:05 Cervical response to thoracic deformity:

What does this mean for the PED & ASD world?

09:35 The days following PSO - Post op considerations, complications, return to normal functions and outcomes

09:50 From degenerative to deformed spines:

When & how to employ new techniques to achieve lordosis?

10:05 My strategy to avoid proximal junctional kyphosis PJK

10:35 Coffee break

10:50 Are the current HRQL really evaluating quality of life and are they useful to assess surgical outcomes ?

11:05 Risk stratification for ASD: Metrics, decision making, pre-op indicators for successful outcome

Breakout Session III

12:10 Lunch

Breakout Session IV

Plenary Session

13:45 Evolution of surgery for AIS over 35 years: Have outcomes improved?

14:00 Key take aways, final considerations and wrap up

14:15 End of meeting and transfer to airport

S. Charosky/ J. Dubousset

Breakout sessions I & II

Group 1: Failed Fusion: Revision considerations in adult deformity correction

I. Obeid/ P. Zouboulis

Group 2: PSO or not PSO: When is it appropriate and what are the techniques that create necessary alignment from anterior or posterior?

S. Charosky/ L. Lenke

Group 3: Is early intervention best for managing EOS patients?

J. Pizones/ M. Repko

Group 4: Sagittal imbalance in post-traumatic deformity: From «minor» to «major» cases: when, how and why to correct?

M. Gehrchen/ F. Pellisé

Group 5: Pearls and pitfalls of managing syndromic spinal deformity

A. J. Bowey/ M. Ruf

Group 6: State of the art for AIS 3D correction: How to correct the axial and Sagittal plane?

I. Helenius/ J. Trivedi

Breakout sessions III & IV

Group 1: High-risk elderly patients: When to operate and what do you do when you don't?

M. Gehrchen/ J. Trivedi

Group 2: How to achieve surgical correction for sagittal plane deformity step by step

S. Charosky/ F. Pellisé

Group 3: Best practice for AIS. How do we do it better, decrease LOS and return them to play?

A. J. Bowey/ M. Ruf

Group 4: Can we avoid complications by stopping short at the sacrum?

J. Pizones/ P. Zouboulis

Group 5: Strategies for severe curves correction in Pediatric patients

I. Helenius/ M. Repko

Group 6: Intraoperative neuromonitoring during adult spinal deformity surgery: Alert positive cases in different surgical procedures

L. Lenke/ I. Obeid
